Techniques that Support Novice and Struggling Mathematics Teachers
RUSMP Team

• Anne Papakonstantinou, Director
• Richard Parr, Executive Director
• Susan Troutman, Director of Secondary Programs
• Carolyn White, Director of Elementary Programs
In your experience, what are the greatest needs of novice and struggling teachers?

In your experience, what techniques have you found to be most successful in helping novice and struggling teachers?
What do novice and struggling mathematics teachers need?

Knowledge for Teaching
Skills for Managing Instruction
Skills for Developing Collaborative Relationships
What do novice and struggling mathematics teachers need?

- Knowledge for Teaching
- Skills for Managing Instruction
- Skills for Developing Collaborative Relationships
Knowledge for Teaching

Novice and struggling teachers need help:

- collaboratively planning engaging lessons that incorporate effective pedagogical practices to develop mathematics content;
- presenting applications for mathematics concepts; and
- considering students’ prior conceptions about mathematics when planning curriculum and instruction.

- Knowledge for Teaching
- Skills for Managing Instruction
- Skills for Developing Collaborative Relationships
Skills for Managing Instruction

Novice and struggling teachers need help:

• using cooperative learning groups;
• using hands-on activities to develop mathematics concepts;
• managing a class of students who are using manipulatives;
Skills for Managing Instruction

Novice and struggling teachers need help:

• using technology as an integral part of mathematics instruction; and

• using strategies which incorporate innovative and emerging formative and summative assessment techniques.

Building Self-Efficacy

Expert Teachers
Ten Ways to Support Novice and Struggling Teachers

1. Provide them with a reasonable schedule and manageable class sizes.

2. Integrate them into the school culture and into communities of practice.

3. Assign them appropriate mentors.

4. Help them understand the school curriculum and assessment schedule.
Ten Ways to Support Novice and Struggling Teachers

5. Assist them in collaboratively planning student-centered lessons.

6. Assist them in establishing classrooms that actively engage students.

7. Help them develop communication skills to successfully interact with others.
Ten Ways to Support Novice and Struggling Teachers

8. Provide support for them in their classrooms (observe, coach, model teach, co-teach).

9. Help them join the greater mathematics and mathematics education community.

10. Develop their self-efficacy by providing them with leadership opportunities.
This presentation is based, in part, on a project partially funded by the Teacher Quality Grants program at the Texas Higher Education Coordinating Board (Grant #496). The Teacher Quality Grants Program is supported through federal funds under NCLB Title II, Part A.
