

**PROGRAM
ANNOUNCEMENT
Summer 2025**

Program for Teachers of Grades 2-5

**July 22-25 (9:00 a.m. – 3:00 p.m.)
in the RUSMP classroom, 5615 Kirby Drive, Suite 300**

This program is designed for elementary teachers who are seeking to strengthen their understanding of the vertical alignment of length, perimeter, area, and volume in grades 2-5. Topics will be explored through engaging researched-based hands-on explorations, correlations to children's literature, awareness of mathematics in everyday life, and assessments to measure student understandings.

The topics that will be explored in this program include:

- Using measuring tools to find length of objects
- Solving problems involving length including estimation
- Identifying relative size of measurement in customary and metric systems
- Converting measurements within same measurement system
- Determining the perimeter or polygons and area of rectangles
- Finding the volume of a rectangular prism
- Solving problems involving perimeter and area
- Test-taking strategies

Each teacher will receive program materials and professional development credit.

Enrollment is limited.
